WORK HISTORY

Frontend Developer

June 2024 - August 2024

No-Country

In this role, the team was responsible for developing the user interface and managing server integration for an online commerce application. Collaboration ensured that the interface was both intuitive and efficient, with optimized server interactions. Guided by a Scrum Master, the team employed an agile methodology, allowing for quick adaptation and successful completion of the project within the development cycles.

Technologies: HTML, TailwindCSS, React-Native, JavaScript (JS),

Frontend Developer

May 2022 - November 2022

Dev Place- Aticma

The team worked on developing the user interface and managing Back-End integration for an e-commerce web platform. Effective collaboration ensured the creation of a user-friendly and functional interface, while also optimizing server communication. Under the guidance of a Scrum Master, agile practices were followed, facilitating rapid iteration and adaptation to changes. This collaborative and structured approach led to the successful completion of the project across the sprints.

Technologies: HTML, TailwindCSS, React-JS, JavaScript (JS),
